1. This is the current functionality in MHARS that will show the patient's name in red with an exclamation point, if there is a warning for this patient. Applies to all warnings, not just suicide risk. 2. This is our new suggestion to show the agreed upon text if the patient has a current alert based off the C-SSRS. There will be a hover that will state, "Go to Solicide: C-SSRS under MHARS Links on the laft hand side."

3. The description will show all the behaviors that have been selected for this patient throughout their lifetime. If they have a Warning, YES' will be displayed in the Warning column. 4. To get more details, the user would select the C-SSRS icon on the left hand side. This would bring them to the C-SSRS main page. See other mockup for further details.

4/5 <u>past month</u> OR behavior <u>past 3 months</u> = highest level "SUICIDE WARNING"
4/5 OR behavior <u>ever</u> = "SUICIDE HISTORY" – suicidal risk elevated
